

Anubis - Bug #62

Syscall file\_size() may fail silently

09/18/2009 12:18 PM - Anonymous

| Into VM, the file_size() always returns a value. But implementations may fail under some rare conditions. So this is a real problem for Anubis because an error case can't be tested and detected. |                 |                        |            |
