Target version:	1.8		
Platform:		Triage Stage:	
Resolution:	fixed		

Description

With the following error message (2nd frame), the explanation order of the types contains in "Mailing_Queue_Entry" is reversed. The real statement of Mailing_Queue_Entry is

```
public type Mailing_Queue_Entry:
  empty,
  relay(Mailing_Queue_ID  mailing_q_id,
        Mailing_Recipient_ID mailing_recipient_id,
        String          user_from,
        String          file_name,
        String          header,
        String          recipient,
        Send_Timeout    timeout,
        Send_Tries      tries).
```

and we can see, it begin with "Mailing_Queue_ID" not "Send_Tries" as written in **error message**.

D:\Documents and Settings\david\Mes documents\Calexium\EZMailBox\EZMailBox\src\smtp_mailing_sender.anubis(72,32) :
Error E021: The operation is incompatible with the arguments.
(It may also happen that the wanted operation has not been defined.)
Interpretations of operation:

1. D:/Documents and Settings/david/Mes documents/Calexium/EZMailBox/EZMailBox/src/database/mailing.anubis:85:
relay

```
public define
  Mailing_Queue_Entry
  relay
  (
    Send_Tries mailing_q_id,
    Send_Timeout mailing_recipient_id,
    String user_from,
    String file_name,
    String header,
    String recipient,
    Mailing_Recipient_ID timeout,
    Mailing_Queue_ID tries
  ).
```

Interpretations of arguments:

argument number 1:

1. Mailing_Queue_ID

argument number 2:

1. Mailing_Recipient_ID

argument number 3:

1. String

argument number 4:

1. String

argument number 5:

1. String

argument number 6:

1. String

argument number 7:

1. Int32

argument number 8:

1. Int32
